

Supplements & Nutraceuticals

This one-pager provides a concise overview of Sostie's core product family, including representative CAS numbers and brief application-focused descriptions. It is designed to give a clear snapshot of our sourcing scope, product expertise, and the types of chemicals we supply across nutraceutical, food, pharmaceutical, and industrial markets. Should you require a product not listed in this one-pager, please contact us at the email address below.

Products and Descriptions

Curcumin 95% CAS:458-37-7	a high-purity turmeric extract commonly used in nutraceutical and dietary supplement formulations, valued for its anti-inflammatory and antioxidant properties.
Tetrahydrocurcumin CAS 36062-04-1	a colorless curcumin metabolite widely used in nutraceutical and cosmetic formulations, valued for its strong antioxidant properties and improved stability compared to curcumin.
Piperine CAS 94-62-2	a natural alkaloid extracted from black pepper, commonly used in nutraceutical formulations to enhance the bioavailability of active ingredients and support metabolic health.
Gingerol CAS 23513-14-6	a bioactive compound derived from ginger, widely used in nutraceutical formulations for its anti-inflammatory, antioxidant, and digestive health benefits.
D-Galactose CAS 59-23-4 - Plant based	a plant-based monosaccharide used in nutraceutical and pharmaceutical formulations, valued for its role in energy metabolism and as a functional ingredient in specialty applications.
Potassium Phosphate CAS:7758-11-4	an inorganic salt commonly used in food, nutraceutical, and pharmaceutical applications as a buffering agent, electrolyte source, and pH regulator.
Citric Acid	a widely used organic acid applied in food, nutraceutical, and pharmaceutical formulations as an acidulant, preservative, and pH regulator.
Magnesium Taurate	a chelated form of magnesium combined with taurine, commonly used in nutraceutical formulations to support cardiovascular, nervous system, and muscle function.
Sodium butyrate 98%	a high-purity short-chain fatty acid salt used in nutraceutical and feed formulations to support gut health, intestinal integrity, and microbiome balance.
